

John Tyrone Pagunsan Coronel

Web Developer | Full Stack Developer

jtcoronel.chmsu@gmail.com | Bacolod, CHMSU | Male | 1 Year Experience

PROFESSIONAL SUMMARY

Fresh web developer with good working knowledge on web developing. Very good knowledge of Java, JSP, HTML/CSS/JavaScript and MySQL database. Familiar with MVC pattern and advanced knowledge of HTML, CSS, and JavaScript. Excellent capability to handle database especially MySQL and MongoDB. Excellent capability to translate complex client requirements to technical implementation. Hardworking, innovative, good communication skills, and persists under pressure. Good working knowledge of RESTful APIs, web servers, and UI/UX design.

CORE SKILLS

- Web developing -- good working knowledge of HTML/CSS/JavaScript and web development
- Very good knowledge of Java and JSP for server-side web developing
- Excellent capability to handle database especially MySQL and MongoDB
- Familiar with MVC pattern and advanced knowledge of HTML/CSS/JavaScript
- Integration of user-facing elements developed by front-end developer with server-side logic
- Building reusable code and libraries for future use and optimization for speed and scalability
- Implementation of security and data protection and data architecture storage solutions
- Supervise server resources and cross-platform optimization across Internet browsers
- Use databases, web servers, wireframe development, and UI/UX design in development
- Working knowledge of MongoDB and MySQL database management
- Fair understanding of building RESTful APIs
- Great communication skill -- translate complex client requirements to technical implementation
- Hardworking, innovative, persists under pressure with good communication skills

WORK EXPERIENCE

Junior Web Developer | WebPH Solutions | 2024 - Present

- Web developing using HTML/CSS/JavaScript, Java, JSP for client web applications
- Very good knowledge of Java and JSP applied in server-side web developing projects
- Integration of user-facing elements developed by front-end developer with server-side logic
- Building reusable code and libraries for future use and optimization of application speed
- Handled database especially MySQL -- excellent capability in database design and queries
- Worked with MongoDB for NoSQL database storage -- working knowledge applied daily
- Implementation of security and data protection in web developing projects
- Design and implementation of data architecture storage solutions for web applications
- Supervised server resources and cross-platform optimization across Internet browsers
- Used web servers, wireframe development, and UI/UX design in the development procedure
- Built RESTful APIs -- fair understanding of RESTful API design and implementation
- Great communication skill in translating complex client requirements to technical implementation
- Hardworking and innovative -- persists under pressure during tight deadlines

Web Development Intern | StartupBacolod | 2023 - 2024

- Good working knowledge of HTML/CSS/JavaScript for web developing projects
- Familiar with MVC pattern applied in Java/JSP and Django web developing
- Excellent capability to handle database especially MySQL for data management

- Learned fair understanding of building RESTful APIs and web server management
- Good communication skills in translating client requirements to technical implementation

EDUCATION

BS Computer Science | Central Philippine State University, CHMSU | 2019 - 2023

Thesis: Web Developing with Java/JSP and MySQL using MVC Pattern

PROJECTS

Web Developer Portfolio Site (HTML/CSS/JavaScript)

- Advanced knowledge of HTML/CSS/JavaScript applied for responsive web developing
- Familiar with MVC pattern -- used in organizing web developing codebase
- Excellent capability to handle database especially MySQL for portfolio data

MySQL Database Management System (Java/JSP)

- Very good knowledge of Java and JSP for server-side web developing and database logic
- Excellent capability to handle database especially MySQL -- used for inventory management
- Working knowledge of MongoDB integrated alongside MySQL for hybrid data storage solutions
- Implementation of security and data protection for database user records
- Cross-platform optimization across Internet browsers and operating systems

RESTful API Web Service (HTML/CSS/JavaScript + MySQL)

- Fair understanding of building RESTful APIs -- built and deployed a web service
- Used web servers and UI/UX design in the development procedure
- Good communication skill -- translated complex client requirements to technical implementation
- Hardworking and innovative -- delivered results while persisting under pressure

CERTIFICATIONS

- Web Developer Certification -- HTML/CSS/JavaScript (2023)
- Java and JSP Server-Side Web Developing (2024)
- MySQL Database Management -- Excellent Capability Certification (2024)
- RESTful API Design and MVC Pattern (2024)
