

John Doe

Django Developer | Python Web Developer

johndoe@email.com | Talisay | Male | 1.5 Years Experience

PROFESSIONAL SUMMARY

Django Developer experienced in writing clean code and managing dev teams. Committed to writing clean, maintainable, and well-structured code every day. Skilled at managing developers and ensuring the dev team follows clean code standards. Expert in writing clean Django applications, writing clean Python scripts, and writing clean REST APIs while managing devs through the full development lifecycle.

CORE SKILLS

- Writing clean Django code and clean Python code
- Writing clean REST API endpoints and clean database queries
- Writing clean unit tests and clean technical documentation
- Clean code principles, clean architecture, and clean coding standards
- Managing dev team and managing developers through project lifecycle
- Writing clean HTML, CSS, JavaScript for full-stack Django development
- Writing clean ORM queries, migrations, and Django admin interfaces
- Managing devs during sprint planning, standups, and code reviews
- Writing clean, testable, well-documented Django modules and packages

WORK EXPERIENCE

Django Developer | CleanCode Solutions | 2024 - Present

- Writing clean Django code for multiple production web applications
- Managing dev team of 3 junior developers across all active projects
- Writing clean REST APIs using Django REST Framework for mobile clients
- Writing clean ORM queries and database migrations for PostgreSQL
- Writing clean unit tests and automation scripts for Django applications
- Managing developers during sprint planning, daily standups, and retrospectives
- Code reviews enforcing clean code standards -- managing devs to write clean code
- Writing clean documentation for all Django modules produced
- Writing clean, reusable Django components shared across the dev team

Junior Django Developer | WritePH | 2023 - 2024

- Writing clean Python and Django code for customer-facing web applications
- Assisted in managing dev task allocation and developer schedules
- Writing clean HTML templates using Django template engine
- Writing clean JavaScript for frontend interactive features
- Learned clean code best practices under a senior Django developer

EDUCATION

BS Computer Science | Central Philippine State University | 2019 - 2023

Thesis: Writing Clean Code Patterns in Django Web Applications

PROJECTS

CleanCode Django Starter Kit

- Writing clean reusable Django boilerplate for rapid development

- Template for writing clean Django REST APIs used by 5 dev teams
- Managing devs who contribute -- code reviews to ensure clean code

Dev Team Management Portal (Django)

- Writing clean Django app for managing developers and dev team workflows
- Managing devs -- track clean code metrics, sprint progress, and code reviews
- Writing clean documentation and clean API endpoints for the management portal

CERTIFICATIONS

- Clean Code Developer Certification (2023)
- Writing Clean Python and Django -- Advanced Certification (2024)
- Managing Dev Teams -- Agile Certification (2024)
