

John Doe

Web Developer | Full Stack Developer

johndoe@email.com | Bacolod, CHMSU | Male | 1 Year Experience

PROFESSIONAL SUMMARY

Fresh web developer with good working knowledge on web developing. Very good knowledge of Java, JSP, HTML/CSS/JavaScript and MySQL database. Familiar with MVC pattern and advanced knowledge of HTML, CSS, and JavaScript. Excellent capability to handle database especially MySQL and MongoDB. Excellent capability to translate complex client requirements to technical implementation. Hardworking, innovative, good communication skills, and persists under pressure. Fair understanding of building RESTful APIs.

CORE SKILLS

- Web developing -- good working knowledge of HTML/CSS/JavaScript
- Very good knowledge of Java and JSP for server-side web developing
- Excellent capability to handle database especially MySQL and MongoDB
- Familiar with MVC pattern and advanced knowledge of HTML/CSS/JavaScript
- Integration of user-facing elements developed by front-end developer with server-side logic
- Building reusable code and libraries for future use
- Optimization of application for maximum speed and scalability
- Implementation of security and data protection
- Design and implementation of data architecture storage solutions
- Supervise server resources and cross-platform optimization across Internet browsers
- Use databases, web servers, wireframe development, and UI/UX design in development
- Working knowledge of MongoDB and MySQL
- Fair understanding of building RESTful APIs
- Great communication skill -- translate complex client requirements to technical implementation
- Hardworking, innovative, good communication skills, and persist under pressure

WORK EXPERIENCE

Junior Web Developer | WebPH Solutions | 2024 - Present

- Web developing using HTML/CSS/JavaScript, Java, and JSP for client web applications
- Very good knowledge of Java and JSP applied in server-side web developing
- Integration of user-facing elements developed by front-end developer with server-side logic
- Building reusable code and libraries for future use and optimization for speed and scalability
- Excellent capability to handle database especially MySQL -- database design and queries
- Working knowledge of MongoDB and MySQL applied daily for web developing projects
- Implementation of security and data protection for web applications
- Design and implementation of data architecture storage solutions
- Supervised server resources and cross-platform optimization across Internet browsers
- Used databases, web servers, wireframe development, and UI/UX design in the development procedure
- Fair understanding of building RESTful APIs -- built and integrated web services
- Great communication skill -- excellent capability to translate complex client requirements
- Hardworking and innovative -- persist under pressure during tight deadlines

Web Development Intern | StartupBacolod | 2023 - 2024

- Good working knowledge of HTML/CSS/JavaScript for web developing
- Familiar with MVC pattern applied in Java/JSP web developing projects

- Excellent capability to handle database especially MySQL for data management
- Fair understanding of building RESTful APIs and web server management
- Good communication skills in translating complex client requirements to technical implementation
- Hardworking, innovative, and persists under pressure in fast-paced startup environment

EDUCATION

BS Computer Science | CHMSU, Bacolod | 2019 - 2023

Thesis: Web Developing with Java/JSP and MySQL using MVC Pattern

PROJECTS

Full Stack Web App (Java/JSP + MySQL)

- Very good knowledge of Java and JSP -- built complete server-side web developing project
- Excellent capability to handle database especially MySQL -- managed 10,000+ records
- Familiar with MVC pattern -- used throughout the web developing architecture
- Implementation of security and data protection for user data
- Cross-platform optimization across Internet browsers and operating systems

RESTful API Service (HTML/CSS/JavaScript + MongoDB)

- Fair understanding of building RESTful APIs -- designed and deployed RESTful web service
- Working knowledge of MongoDB as primary database for the RESTful API project
- Advanced knowledge of HTML/CSS/JavaScript for the front-end of the web service
- Used web servers, wireframe development, and UI/UX design in the development procedure
- Great communication skill -- translated complex client requirements to technical implementation

CERTIFICATIONS

- Web Developer Certification -- HTML/CSS/JavaScript (2023)
- Java and JSP Server-Side Web Developing (2024)
- MySQL and MongoDB Database Management (2024)
- RESTful API Design and MVC Pattern Certification (2024)
